

Dr Beneyam Berehanu received his PhD and MSc degree in Communication Engineering in 2010 and 2016 from Aalto University, Finland and his BSc degree in Electrical Engineering in 2007 from Bahir Dar University, Ethiopia. Currently, he is an Assistant Professor at Addis Ababa Institute of Technology, Ethiopia researching and supervising 5G related technologies. He has worked as telecom researcher and research scholar in various 4G and 4.5G research projects at Aalto University, Finland and University of California Davis, USA for more than seven years producing quality results published in international telecom journals and conferences. He has also served as wireless trainer for telecom programs in Aalto University and iCT capacity building project in Ethiopia and Tanzania. Furthermore, he has initiated, proposed and coordinated successful international iCT projects including ENhANCE and AFRICON 2015, both contributing to build capacity of the Ethiopian iCT & Telecom Sector. He regularly works as trainer and advisor to the local telecom operator ethio telecom and ministry of iCT on issues of system and next generation network updates.
